Survey II Architectural Scavenger Hunt
Due on the day of the final
Worth up to 10 points of extra credit to be applied to grade of final exam

For this extra credit assignment, you need to correctly identify one example of each of the architectural elements listed below. You will receive one point for each of the elements that you find. You can find some of these items on buildings on campus, but to find all of them, you will need to travel down Main Street and into the square. You will then turn right, down North Church Street, and a short way down College Street, in both directions. (See the map below).

For the scavenger hunt, take a picture of the building that contains the element. Later, drop the images into a Word document and label the images with the element you have identified and circle the element. The image should be of the entire building, not just the detail of the element.

You are only allowed one element per building, so your paper will include 10 separate buildings.

You should also include a picture of yourself with one of the buildings on College Street. This will be your “receipt.”

Features to find:
1. Ionic column
2. Corinthian column
3. Fluted column
4. Pediment
5. Colonnade
6. Domed building
7. Round arch
8. Pointed arch
9. Romanesque-style building (in this case, identify the features that make the building Romanesque-esque)
10. Stained glass window
