Learning Outcomes

When you complete Chapter 11 Information Literacy you are expected not only to understand the material presented but also you should be able to

- **Explain** the elements involved in information literacy
- **Identify** library databases used to find books, general periodicals, subject-specific periodicals, newspapers, and Internet sources.
- **Follow** a systematic approach to a research topic, including identifying and narrowing the topic; finding books, periodical and Internet sources; and evaluating each source and listing information that should be cited.
- **Access** library resources from an off-campus site.
- **Explain** how to evaluate an Internet site for accuracy, authority, objectivity, currency, and coverage.
- **Locate** reliable biographical sources by using various library biographical databases.
- **Explain** the learning process modeled in this chapter.
