CHAPTER 6

Processing Information from Lectures
Learning Outcomes

When you complete Chapter 6 Processing Information from Lectures you are expected not only to understand the material presented but also you should be able to

*Use* the ten memory principles to *develop* strategies for processing information from classroom lectures.

*Appraise* your listening habits and *construct* strategies for improving them.

*Describe* several reasons for taking notes in class.

*Demonstrate* the six steps of the Question in the Margin system for taking notes: record, label with a question, recite, reflect, review, and summarize.

*Explain* how to use the Question in the Margin system to someone who has never used it.

*Explain* the learning process modeled in this chapter.
