When you complete Chapter 8: Learning Styles you are expected not only to understand the material presented but also you should be able to

**Determine** your preferred learning styles, including sensory mode, hemispheric dominance and multiple intelligence.

**Practice** the strategies presented in the chapter to determine the most efficient strategies for you to process difficult material and strategies to reinforce the initial learning.

**Demonstrate** ways to adapt new learning material to their preferred learning styles.

**Analyze** a case study, and **construct** advice for a student having difficulty finding effective study methods.

**Explain** the learning process modeled in this chapter.
